REPORT OF SUPERINTENDENT OF SCHOOLS

The members of the Marlow School Board:

I herewith, submit my fifth report as superintendent of your schools.

A study of the accompanying statistical report will disclose the fact that the year 1928-1929 was one of decided progress in the schools of Marlow. The percentage of attendance was the highest in recent years, 93.86. The number of tardinesses was 137 and the lowest on record. The children and the parents of Marlow appreciate their schools, as is shown by regular attendance and few late arrivals. Standardized tests given in both schools prove the work in the fundamentals to be on a level with that of the best schools of the country. To further emphasize the importance of good scholarship in our schools there was instituted, last year a scholarship contest in which all grammar schools of this union were represented. Each school sent one or two teams of three pupils each to Charlestown, on the appointed day—not to engage in play or to have a good time but to take examinations in Arithmetic, History, Reading and Geography. No prizes were offered, the only reward being the announcement of the results of these tests by teams and schools. I am sure the interest shown by the contestants and the competing schools answered the criticism sometimes heard that pupils now-a-days do not care for scholarship.

During the summer, the school building was renovated on the outside, so that it is now an attractive plant, with the exception of the entrance. The system of heating and ventilation has long been unsatisfactory. Recently the windows have been altered so that it is now possible for them to be lowered from the top and in such a way as to prevent direct drafts through

the room. Jacketed stoves—or better still—modern self ventilating stoves should be installed that heating may be evenly and economically distributed.

A recent movement in Education is the broadcasting of school courses of study under the direction of the United States Commissioner of Education. The first series of courses started February 4 and consisted of broadcasts twice weekly, of History and English lessons for the upper grammar grades. The time will soon be here when a school will be “out-of-date” that is not equipped with a good radio. The music appreciation hour of the New York city schools is broadcast directly from the New York class rooms. A radio in school would bring to the pupils of Marlow exactly the same work as the children of that rich city enjoy. These courses are just the beginning of more valuable work to come. In towns where school budgets must be carefully watched school boards will be hesitant about installing radios. It is here that the opportunity is offered to the large number of citizens who are interested in the schools, to show this interest in a way that will add much to the efficiency of those schools and bring a refining and broadening influence into the lives of our pupils. Is there not some individual or society that is able and would be willing to contribute to such a cause?

I wish to express my appreciation for the kindly interest shown by the great majority of the citizens of Marlow and for the helpful advice of the board individually and as a group.

Respectfully submitted,

ROY W. GILLMORE,

Supt. of Schools.
